

COMPANY DATA PARTNERSHIPS

Your company's operational data could be worth **\$50k-\$4M+**.
We help you package it and securely license it to leading AI labs.

[Value my data →](#)

THE OPPORTUNITY

A new revenue stream from work
you've already done.

AI labs have already scraped the internet. They now need private examples of real work to improve their models. Sureform turns the operating history already inside your business into a data asset they can license.

WHAT YOU HAVE

Historical operating data

Messages, documents, tickets, code, business system records, knowledge bases, or completed tasks.

WHAT WE DO

Make it safe and licensable

We value it, define the scope, remove sensitive or personally identifiable information, package it, and find approved AI buyers.

WHAT YOU GET

Revenue from licensing deals

You keep ownership of the underlying data and your company is compensated for each licensing deal done with an AI lab.

HOW THE PARTNERSHIP WORKS

From a private valuation to a paid data license.

You approve the sources, permitted use, prepared output, and delivery terms at every stage.

01

Get a private valuation

Fill out our [onboarding form](#). No raw files or connected tools are needed.

02

Schedule a call and set the scope

You decide what is included or excluded, then agree on use, security, and terms.

03

Securely transfer the approved data

Only approved data is transferred. Any system access is read-only and limited.

04

We de-identify and package it

We remove sensitive or personally identifiable information with an automated pipeline.

05

Approve the delivery and get paid

We manage qualified AI buyer licenses. Your company is paid under each completed agreement.

SECURITY

Data security and privacy are our
top priorities.

You approve the systems, folders, record types, date ranges, and permitted use before any data is transferred. Approved data is encrypted in transit and at rest, and is fully de-identified using automated pipelines.

- Written scope
- De-identification and review

- Encrypted processing
- Licensed delivery only
